

# 2010 Global NGO Deworming Inventory

## Summary Report: Deworming Programs by Country

### Key

**A Region:** Geographic region as defined by WHO.

**B Country:** Country in which deworming activities were reported.

**C Reporting organization/source:** Organization that submitted the treatment report to the Inventory. Reporting organization may have distributed drugs to children or partnered with an implementing partner to distribute the drugs.

**D Implementing partners:** Organization that distributed the drugs to children in country. In some cases, the implementing partner is not specified (N/A). Only the Reporting Organization is provided.

**E Drug(s) used:** The drug or combination of drugs provided to children to treat soil-transmitted helminths, schistosomiasis, or lymphatic filariasis. ALB: albendazole; MBD: mebendazole; PZQ: praziquantel; IVM: ivermectin.

**F Drug donor (source):** The source from which the drugs were procured or the organization that donated the drugs. In some cases, the source of the drugs is not specified (N/A).
